# 2021 London Lines Replacement Project

## Project details

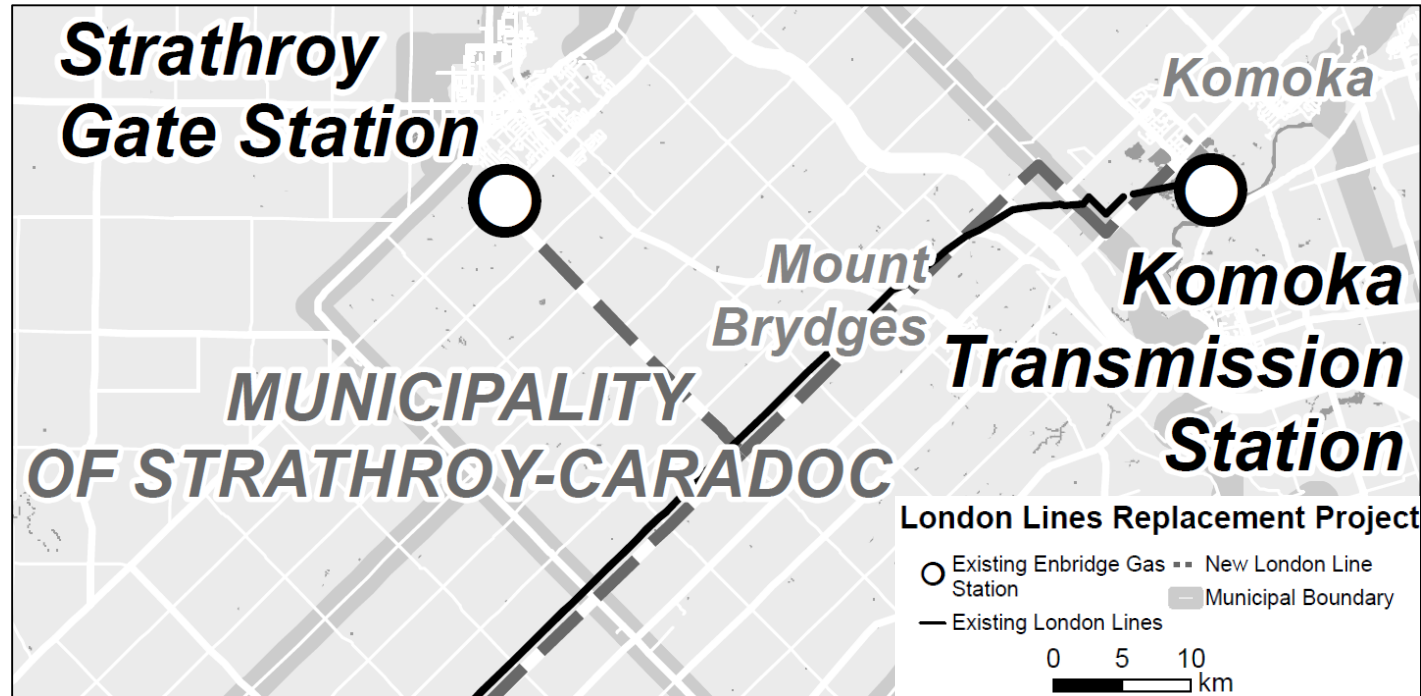

- Purpose and details:
  - Replace existing London Lines (2) pipelines to improve integrity of pipeline network, increase system flexibility and ensure adequate supply to the area.
  - Majority of existing London Lines were installed between 1930's to 1950's.
  - Replace with 1 new, 82km pipeline, combination of 4-and-6 inches in diameter installed at higher pressure.
- Cost: \$164M
- Approved by the Ontario Energy Board on January 28.
- Environmental report completed.

# 2021 London Lines Replacement Project

Project details continued – existing London Lines portion

- Hundreds of customers are connected directly to the existing London Lines, and multiple communities are served indirectly, including Melbourne and Mount Brydges; this will not change.
- Access to natural gas will be open to approx. 10 properties that currently do not have access along Avro and Falconbridge.
- Construction timeline – spring 2021 to December 2021. Project clean-up and restoration to occur in 2022.
- Continue to work with Municipal staff to ensure all permitting is obtained and requirements are followed.

# 2021 London Lines Replacement Project

## Project details continued – new Sutherland Road pipeline

- Purpose: increase reliability and system flexibility for customers in Strathroy-Caradoc.
- Residents, businesses, and farms along Sutherland will have access to natural gas from the pipeline following its construction, from early 2022-onward.
- We estimate there are approximately 15 properties along Sutherland that will now have access to natural gas.
- Residents along Sutherland to be sent a letter in the coming weeks with details on how they can get connected following the construction.

# 2021 London Lines Replacement Project

## What can residents expect during construction?

- February-March: Site preparation, tree and vegetation clearing as needed.
- April-December: Construction.
- Any residents who are connected directly to the pipeline will have service interrupted for a short period to install their new service. This will be done at a time which is most convenient to them.
- The project will have a community liaison position to keep the community informed.
- The project will also have a landowner relations agent available during construction to work with project landowners.
- Community investment.
- Key construction activities such as road closures or detours during construction will be communicated in advance.
- A project phone line and email account have been established:
